Objection

With regard to WSCC latest minerals site there is no demand for additional brickmaking as West Sussex has enough reserves for the next 25 years and therefore without the mineral site there is no justification for a waste site at this very unsuitable location in a ancient woodland as this is also a green field site.

Loxwood and the surrounding area roads are country roads and not suitable for the additional 44 daily runs of heavy good vehicles for the next 33 years causing the destruction of our roads as what has happened to Wildwood Lane in the adjoining county of Surrey who have had large heavy goods vehicles travelling up it daily filling in a disused Quarry causing many near misses with other traffic. I have walked through these woods since moving into Loxwood 28 years ago and having large heavy goods vehicles tearing up footpaths and bridleway's and endangering wildlife and no doubt have encounters with people is just not acceptable.

We are meant to be planting trees to save this planet from climate change not cutting them down to bury rubbish in the future. we need to save what we have and not destroy it for commercial purpose.
