Comments	<p>Unnecessary destruction of beautiful woodland and countryside. 33 years of disruption, noise and pollution 42 HGVs a day, 12,600 PA. along the Loxwood Road carrying waste in skips. The roads can barely manage the current traffic and are seldom repaired. This level of traffic will only add to the stress of the surface with no additional support to fix it. Severe risk to public safety in woodland as HGVs will run alongside and cross public rights of way including bridlepath. Waste plant Net biodiversity LOSS of 36% (LCP Agents numbers)</p> <p>You have the chance to stop this, or is greed and money your only desire?</p>
