Comments	<input type="text" value="Global warming is now a proven phenomenon. Destroying an ancient woodland and filling it with building rubbish for thirty years will add to our carbon footprint. Surely we should cherish our woodlands ancient or not and not obliterate them for our children's and grandchildren's futures! Added traffic , HGV polluting our atmosphere and safety issues on B roads are more immediate concerns. Destruction of footpaths and bridal ways will also impact upon the many residents who live in the beautiful countryside."/>
