

Comment for planning application WSCC/030/21

Application number	<input type="text" value="WSCC/030/21"/>
Name	<input type="text" value="Rob Robertson"/>
Address	<input type="text" value="HILLCREST, LOXWOOD ROAD, LOXWOOD ROAD, HORSHAM, RH12 3DW"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>I object to this application on grounds of: suitability of location, safety and environmental issues.</p> <p>There is no justification for this installation. Extra clay supplies are not needed in West Sussex. It is not near a brickworks and would need uneconomic and environmentally damaging transport. With a poor case for clay extraction there is no reason to locate a recycle plant in a most unsuitable site. A greenfield site.</p> <p>Current recycle facilities are sufficient for demand.</p> <p>The application plan is for a high percentage of landfill. An increase in recycling would mean more lorry movements.</p> <p>The proposed site involves clearance of historic forest, noise and light pollution, impact on wildlife, extra fossil fuel use and carbon emissions.</p> <p>HGV movements across footpaths and bridleways in farm land and woods is surely dangerous. The route to the A281, Loxwood Road, is unsuitable for these movements. There are few pavements. The road is used by walkers, cyclists, runners and horses. I don't think it is wide enough for two HGVs to pass each other.</p> <p>These movements would be dangerous., noisy and polluting.</p>
