

Comment for planning application WSCC/030/21

Application number	<input type="text" value="WSCC/030/21"/>
Name	<input type="text" value="Carly Tucker"/>
Address	<input type="text" value="21 Newman Way Billingshurst West Sussex RH14 9ZP"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>The proposed site would, quite simply, have a devastating effect on the local community, wildlife and character of this peaceful part of Sussex.</p> <p>Increased traffic on unsuitable roads, noise, pollution and the destruction of this very quiet village is of course one consideration. If it was an essential project with a real need I would understand, but the fact is the reality is there is no demand for clay. I was astounded to read this and to know that regional and National reserves are in good shape with 25 years clay in reserve. This is all coupled with the fact that the local brickworks does not use Weald clay.</p> <p>Without the mineral site, there is no need for the waste site and furthermore the fact it is a greenfield site means it should be protected and valued as an area for precious wildlife. Let's make Sussex an area that priorities nature over greed, we are SO lucky to have ancient woodland and we are nothing without it. We are literally killing our selves by destroying the trees that we so desperately need.</p> <p>As a resident of a nearby village that is facing its own massive development challenges, I am extremely worried about the increase to traffic, the impact on water management and flooding, the safety risks to the roads leading in and out of Loxwood and the increase in carbon emissions to the area. Please consider the objections and say no to this plan, it matters so much to the future of this special part of the county.</p> <p>Thank you for considering my objection.</p> <p>Best wishes,</p> <p>Carly Tucker</p>
