## Comment for planning application WSCC/030/21

Application number	WSCC/030/21
Name	Jenny Monk
Address	Bluefields, Spy Lane
Type of Comment	Objection

I wish to object most strongly for many many reasons, a very few sited below:

- 1. This is a greenfield site national policy states that waste sites should be sited in built-up areas or brownfield sites. This is AGAINST THE LAW.
- 2. The increase in traffic in the small villages will affect everyone without having any benefit.
- 3. The increase in noise pollution. We already have the planes from Gatwick overhead we DO NOT need any extra noise or vehicle pollution.
- 4. Being keen walkers, the closure of footpath 792-1 will mean a significant diversion. A 33 year closure is not a temporary closure!
- 5. The traffic passing through Loxwood will have a significant impact on highway safety through the village. The road is already congested sometimes with only single passing places to accommodate the traffic. Many parts of the area do not have pavements and the enormous HGVs will be relying on children, adults, elderley, animals having to step aside I see a significant danger to life.
- 6. Looking at the reports, the demand for clay is not a priority. WSCC have more than 25 years of reserves. All national and local clay requirements are met.

This is typically a David and Goliath situation - a large corporation trying to railroad over local residents without any substantial need other than greed. This is NOT needed and it is about time that local objections are listened to. This CANNOT go ahead.
