Objection

Having lived in Loxwood for the last 15 years, and recently having moved from the area, I want to register my objection on the grounds of 1) HGV traffic on Station Road - the lane is too narrow for large HGVs, and there will be serious safety issues on the blind corners at Tisman Common, as well as noise and vibration affecting listed properties that are on the lane 2) destruction of ancient woodland and impact on bio-diversity 3) need - there are already sufficient clay deposits in the area - the main aim of this application is to create a landfill site once the clay has been extracted 4) disruption - the site provides walking amenity to the local village and which would be permanently lost. I strongly object!
