Objection

As a local resident who regularly walks at these woods I am deeply concerned by the change to the environment that will happen if this application is allowed to proceed. There is no demand for clay in this area, it is a completely unsuitable area as it is going to damage ancient woodland and cause untold damage to the environment. Rare species of bat and other wildlife will be affected and the peace and tranquillity of the area ruined. The traffic associated with the works will have a negative impact on the surrounding areas in terms of noise and fumes and safety. Even if the clay pit was essential it would be unwelcome at this particular site, the fact it is completely superfluous to requirements makes it all the more galling. I would urge you to reconsider this application as unviable, unwanted and deeply against the wishes of local residents.
