Comments	Impact on the environme habitat for many animal a identified on the site; the The fact that there will be as well as the pollution or result in the net increase digging up the ground. Traffic: With 42 HGV truc Loxwood Road and all the The junction of the A281 exacerbated by the HGV particularly cyclists and p Suitability of Location: Th policy which states that w point exceeds the recomma actual site is 1.3Km from unsuitable roads. Current	affic: With 42 HGV truck movements every day, there will be a massive impact on the traffic on boxwood Road and all the surrounding villages - these roads are not designed for such heavy traffic. The junction of the A281 and Loxwood Road is already dangerous and this risk will be greatly kacerbated by the HGV traffic. Also, the trucks will pose a safety risk to other road users, articularly cyclists and pedestrians. uitability of Location: This is a greenfield site and therefore the proposed plan is contrary to National policy which states that waste sites should be in built-up areas or brownfield sites. The layby access point exceeds the recommended distance from the A281 as the Lorry Route network. In addition, the ctual site is 1.3Km from the layby access and therefore a total of 4.55Km from the A281, mostly on nsuitable roads. Currently, the proposed site and surrounding areas are very tranquil and used ktensively for recreation purposes along a network of footpaths/bridleways. The proposed plan will ave a severe impact on the enjoyment of the area, and will affect the quality of life and mental
