Comments	<input type="text" value="This is a beautiful area which houses and supports various wildlife including deer and is enjoyed by families, walkers and dog walkers. The impact to the environment will be devastating with the loss of trees and damage to wildlife habitat. This is a peaceful and tranquil area, the villages surrounding would not support any extra traffic especially lorries. This would make the roads very unsafe and the pollution would be damaging to health. It is on a road where the current traffic is at a high speed and there are several bends in the road making accidents inevitable. There is already enough supply of clay available so this new pit is not required in addition especially with the impact it will have on wildlife, tree preservation, roads and the surrounding villages."/>
