Comments	<input type="text" value="More destruction of woodland, surely we should be planting trees not ripping them out! I get it that you say it will be turned into wetland habitats etc but will that really happen and how long do the locals have to endure the upheaval, meanwhile?
Also, these local roads are already highly dangerous because of present lorries and vans being driven too fast around unsuitable roads for their size and speeds!
Surely the expense could be put to far more important issues!"/>
