---

Planning Application Number:  
WSCC/030/ 21

I am writing in response to the proposed development in Pallinghurst Woods .

Firstly , as a resident at Hale Barn, a listed building on Loxwood Road, the heavy traffic created by HGV trucks going to and from the site will increase congestion along what is a narrow winding road. Plus the impact of fumes, dust and highway safety.

At a time of concern with climate change , it seems the proposal to destroy part of this ancient woodland , it's habitat and wildlife is at odds with environmental thinking and will increase carbon emissions, create pollution and have a negative impact for many year's to come , and object to the planning application .

Yours sincerely,
