Objection

I strongly object to this planning application because 1) This is a greenfield site and is unsuitable, the access road to the actual site to and from the layby is 1.3 km . This will not only be used by large lorries but also by the people working at the purpose built 1400sq ft building for sorting waste. The people who work on this site will presumably need toilets and electricity this will 2) impact on the natural environment including animals and their habitat. All of this well inside the greenfield site 3) The noise and disturbance will be enormous in an area which is remote and tranquil. This is all planned to go on for 33 years which is quite unacceptable. 4) The traffic on the local narrow roads to the lay-by will make it very dangerous for all users.
