Comments	<p>1. DEVELOPMENT PLAN - this application does not conform with the Loxwood Neighbourhood plan . It would appear to be completely insensitive in terms of location , and , it serves to give no actual benefits whatsoever .</p> <p>2. ENVIRONMENT - this application would apparently cause the destruction of 14.8 acres of Ancient Woodland thereby increasing carbon emissions whilst at the same time disturbing and disrupting the natural habitat wildlife together with rare species of bats .</p> <p>3. REMOTE AREA - PEACE AND QUIET - these features would be destroyed forever and no longer exist due to the introduction of noise , lighting , pollution , dust and dirt .</p> <p>4. TRAFFIC - the roads in this area are country roads which are generally narrow , and , are certainly not in the best of condition . To introduce around 40 HGV's per day would have a very serious negative affect both on those living locally , and , surrounding villages , in terms of noise , dust / dirt , safety of pedestrians , cyclists , horse riders , and , other road users .</p>
