Comments	<input type="text" value="I walk my dog in the area that is going to be destroyed.
My objection is to everything that has been mentioned in the pamphlets.
The roads around the area were not built for heavy duty traffic.
I feel consideration to wildlife, protective species, and local residents have not really been considered.
The extra traffic of these vehicles, will cause more road damage.
It's all about money, and not saving whats left of our countryside.
Considering the state of climate change at the moment,there's no need for this abhorrent destruction to our countryside."/>
