Comments	<p>I object wholeheartedly to the application for the clay pit application in Pallinghurst Woods near Loxwood.</p> <p>Having grown up in this area I am hugely saddened at the thought of this beautiful woods being ripped up and unnecessarily disturbed by a waste facility. I have many happy memories of dog walks all year round in these stunning woods and especially the blooming bluebells every Spring. It would be awful to spoil this part of the countryside with unnecessary noise and smell, disturbing all wildlife living there and completely spoiling this natural environment.</p> <p>This is a Greenfield site so is a completely unsuitable place to ruin. As a frequent visitor still to this area, often staying with my family near by, it would be extremely dangerous to continue to push my baby in a pram as I frequently do now, if waste lorries were on the roads - our family walks would be completely ruined and the lorries would be a huge danger to my three small children and our dog crossing the roads etc. The enormous lorries would be far too dangerous on the small roads surrounding the woods and cause more disgusting pollution to this green area.</p> <p>It is really scary to think that this site is even being contemplated in this beautiful place where my children, the next generation, appreciate so much. Please do NOT let this happen.</p>
