Comments	<p>PALLINGSHURST WOODS - APPLICATION NUMBER WSCC /030/21</p> <p>I wish to object to this proposal on the following grounds -</p> <p>a) The proposal will decimate a beautiful greenfield site beloved by the local community, particularly walkers. It will impact adversely on the habitat of a range of woodland creatures (including bats and badgers).</p> <p>b) The proposed increase in HGV traffic will have a massive (adverse) impact on the local area. The Loxwood - Bucks Green road is narrow, but quite fast. It is busy, particularly in rush hours, and as well as the motor traffic it is used by cyclists (extensively), walkers / joggers, dog walkers and horse riders. The injection of considerable HGV traffic movements could have very worrison implications.</p> <p>c) The proposal seems to be totally at odds with the nation's green agenda. I understand national policy with regard to such waste sites is that brownfield sites should be used - not greenfield sites like this one. More specifically the impact of the length of HGV journeys to continually service the site and the environmental damage due to footpath closures, woodland excavations etc seem almost the opposite of the nation's "green agenda".</p> <p>I therefore am opposed to this application.</p>
