Comments	<p>Waste Site: Without the mineral site there is no justification for a waste site at this unsuitable location</p> <p>Loss of Amenity: Site access for HGV's will run on, alongside, and across established Public Right of Way routes regularly used by members of the public - giving rise to severe safety and health concerns. The application proposes the closure of footpath 792-1 (Northern Boundary) with a significant diversion, at great inconvenience to users. Whilst cited as "temporary" this closure would be for 33 years - a whole generation.</p> <p>Traffic: The significant increase (c300%) in HGV traffic volumes will present a severe safety risk for existing road users along Loxwood Road. This has not been fully assessed. The proposed site access arrangements are not 'safe and suitable' as claimed and represent a severe risk to other road users and pedestrians.</p>
