Comments	This planning application is totally flawed and would have so many detrimental effects on local communities. It goes against our pledges to protect our environment and quality of life. the woods need protection. Landfill is obhorent and the very idea of so many heavy vehicles using our country lanes on a daily basis is appalling. Anyone considering this application must see that it would be wrong to allow it to go ahead. The areas around Loxwood need protection from any such development. Ideally landfill sites should be on brownfield sites and in a location where the necessary vehicle access can be made without affecting quiet rural villages.
