

# Comment for planning application WSCC/030/21

Application number	<input type="text" value="WSCC/030/21"/>
Name	<input type="text" value="Jan Potter"/>
Address	<input type="text" value="LITTLE HOGWOOD, OAK GROVE, OAK GROVE, BILLINGSHURST, RH14 0DN"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>The destruction and devastation to the ancient woodland caused by this proposed plan is beyond imagination. We live in a world where we are asked to be green, care for our environment and contribute wherever we can to prevent global warming, this development is the antithesis of all of the above. It does not enhance or protect the environment and would be devastating to the local community. I fail to see why this site can be deemed suitable as National policy states that waste sites should be located in built up areas or on a brownfield site, this is within ancient woodland in the middle of the countryside!</p> <p>The access route is wholly unsuitable and would be a great danger to the public. The proposed entrance is via a narrow country lane (over 3km away from the A281 which contravenes the recommended distance) where it would be impossible for lorries to pass and a road which is regularly used by cyclists, walkers and horse riders making this an accident waiting to happen.</p> <p>This area has no demand for clay, the site does not conform with the local neighbourhood or district plans and would have a devastating and irreversible impact on the wildlife we are so fortunate to share this beautiful area with.</p> <p>I would ask that you give these points consideration, these are non emotional and based on facts and I strongly object to this application.</p>
