Comments	<p>Dear Sir/Madam,</p> <p>I am writing to object to application WSCC/030/21 on the following grounds.</p> <p>The access and volume of traffic created by this proposed development would make the surrounding roads dangerous for other road users and have a server impact on the local villages as they are too narrow for lorry movement being only 5.1m wide in some parts and 5.5m wide for most of the length of the Loxwood Road which all site traffic would have to pass along in one direction or the other.</p> <p>The planned route to the site crosses many public footpaths and tracks which are in frequent use and the ancient wood land is home to many native species of flora and fauna which can not be replaced once destroyed.</p> <p>It is an unsuitable location for waste disposal as the national policy states that waste sites should be sited in built-up area or brownfield sites.</p> <p>This is a tranquil and remote site which will be polluted by noise/light and sound pollution.</p> <p>I hope you take the concerns of the local residence who will have to live with this for the rest of their lives, they have chosen to live in a rural area because it it rural, peaceful and tranquil, with access to fantastic and beautiful areas such as Pallingshurst Woods and the surrounding countryside.</p> <p>Kind Regards Claire Venn</p>
