| Comments | I object to this proposal for several reasons. It involves "temporary" closure of a footpath. But for 33 years! That is not temporary. This is a remote tranquil area with low background noise. This would be devastated by industrial quarrying. There is not even a local need for clay. Transporting it long distances is not environmentally sound. At a time when we are increasingly recognising the value of woodlands we should not be cutting them down. New developments should be carbon neutral whereas this development would cause a large ne increase in CO2 emissions which is against WSCC policy. |
