| Comments           | Our family with young children regularly go for exercise around the area of the proposed development.  |  |
|                    | We object to it as the planned development would generate increased HGV traffic movement in a completely unsuitable location with a highway that is inadequate to handle and will severely increase the risk to the health and safety of pedestrians and other road users. |  |
|                    | This is a greenfield site and therefore highly inappropriate for the application made as per national policy.  |  |
