## Comment for planning application WSCC/030/21

Application number	WSCC/030/21
Name	MAURICE WATTS
Address	SUNFLOWERS, THE DRIVE, THE DRIVE, BILLINGSHURST, RH14 0TB
Type of Comment	Objection
Comments	I strongly object to these proposals for the following reasons:
	The proposed development would cause immense damage to this peaceful rural site. The felling of woodland would cause severe loss and disturbance of wildlife habitat including home to some rare and threated species. There would be a great deal of disruption caused during construction of the site and also during the proposed operation term of 30 years. The increased HGV movements will have a long term negative impact on the area. This is likely to greatly increase the noise and disturbance along the proposed approach route to the site and raise safety concerns. The actual operation at the site will entail a high level of noise and disturbance from machinery and earth moving equipment. There is a proposal for a large industrial building, causing some light pollution in an natural area with no other construction.
	This planned operation will have a long term detrimental impact on the area. It will change the peaceful rural natural area and ancient woodland, wildlife could be lost forever and is totally unsuited to this location.
