Objection

I wish to register my objection to the Loxwood Clay Pits Limited proposal to create a commercial waste recycling plant and associated clay pits in the midst of the ancient woodlands of Pallinghurst Woods. These plans would add to the steady erosion of our beautiful countryside and woodlands. These rural roads are totally unsuitable and not designed for the HGV vehicles this application proposes.

The proposed access route to the site cannot be considered safe or suitable for the constant passage of heavy HGVs. Local residents treasure the peace and tranquillity of this area, as do the many forms of wildlife that live alongside us. I ask that you give much thought to how this development, should it be allowed, would impact on all our lives. Therefore, do not consider this application as a possibility, thus threatening the lives of our children and grandchildren.
