Comments	<p>I very strongly object to this proposal.</p> <ol style="list-style-type: none">1. Need for Clay - already sufficient supply.2. Waste Site As note above there is no need for mineral extraction at this site and hence no need to create a waste disposal site. There is sufficient existing waste disposal and re-cycling capacity in WSCC. This would lead to increased HGV movements.3. Site Location - National policy requires waste sites to be in built up areas or brownfield sites - this is a greenfield site with abundant local amenity value and totally unsuitable.4. Loss of Amenity HGV access to the site will severely degrade access to footpaths and bridlepaths.5. Environmental Impact6. Traffic / Road Safety - Conflict between the HGVs and private vehicles would result in a further severe road safety risk.
