Type of Comment Comments Objection

I am very shocked to see this planning request is even being considered. It is completely inappropriate for the wonderful high value amenity. HGV movements within the woods is completely inappropriate and the HGV movements within the community will make the roads very dangerous. There is not enough room for HGVs to pass either. There was a brick kiln just 6 miles away, near Plaistow, that closed due to lack of demand and I understand W.Sussex has more than enough brick suppliers already. We all know that building recycling sites are directed to be on brown field sites or built up areas, not beautiful woodland. In view of the enormous loss of trees around the world, due to a multitude of enormous wild fires, every tree that still stands has just become dramatically more valuable. Biodiversity is is in terrible trouble so this area of woodland increases in biodiversity value all the time. To agree to put this rare forest in danger is, in my and many other voting minds, criminal.
