Type of Comment	<input type="text" value="Objection"/>
Comments	<p>I can't think of a more un-suitable site for clay extraction in the 50 years I have lived in the Surrey/Sussex borders. The proposed site is in area that is used extensively for leisure activities such as walking, cycling and horse riding. The surrounding road infrastructure is not suitable for the increase in traffic from large lorries. The majority of the roads in the area were designed and constructed to support local traffic, not traffic generated by a major commercial concern, similar to the landfill site in Lynwick Street Rudgwick, which has caused major issues to the local environment, traffic levels and overall road safety.</p> <p>In addition to the impact on the roads the site is totally inappropriate and unsuitable. The access route would destroy a large amount of habitat for local wildlife, create significant amounts of pollution, odour, dust and fumes. Rikkyo School would be significantly impacted which is a critical part of the local economy.</p>
