	I object to the development on the basis that this area of forest is of impressive natural beauty and home to some exceptional walks. I previously lived near to this area and through lockdown discovered the magic of walking these woods and continue to travel to visit when passing through. Without these walks, I'm not sure how I would have gotten through the last few years. If the project goes ahead, I have no doubt that the noise, smells and pollution will have a chronic affect on the beauty and landscape and fear this magic will permanently be lost when other built up or brown site locations
