

Comment for planning application WSCC/030/21

Application number	<input type="text" value="WSCC/030/21"/>
Name	<input type="text" value="Paul Griffiths"/>
Address	<input type="text" value="THE BRAMBLE HOUSE, LOXWOOD ROAD, LOXWOOD ROAD, HORSHAM, RH12 3DW"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>This site makes no sense from an environmental aspect There is no demand for clay in the West Sussex area, WSCC have more than 25 years of reserves and the lack of any local brickworks exacerbates the problem Without the claypit site there is simply no justification for a waste site at this unsuitable location. There is currently sufficient capacity for Construction and Demolition waste in West Sussex, in established locations which are far more suitable. Additionally, the applicant's plan is to recycle only 50% of the waste brought onto site. This is well below accepted industry standard. This is a greenfield site, National policy states that waste sites should be sited in built-up areas or brownfield sites. As a resident of Loxwood Road I am particularly concerned about the effect this will have on our Road, a significant increase in HGV traffic (Circa 300%) presenting a severe safety risk to existing road users. Loxwood Road is just 5.1m wide at its narrowest and 5.5m along most of its length and as such is simply not suitable for this level of HGV traffic. There is also a severe highway safety issue at the junction of Loxwood Road/A281 junction at Bucks Green (I am a Bucks Green resident), potential damage to listed buildings which will be affected by the increased HGV traffic along the proposed route, plus the proposed redesign of the areas will result in disruption and loss of public parking and amenity at the lay-by.</p>
