Type of Comment	<input type="text" value="Objection"/>
Comments	<p>Dear Mr Bartlett</p> <p>I would like to object very strongly to this planning application.</p> <p>The area of woodland which the applicant plans to destroy by digging out clay and operating its industrial waste operation is a beautiful local amenity enjoyed by local families like mine for generations.</p> <p>The idea of these tranquil woods, and neighbouring properties like ours, reeling at the noise, vibration and dust of skip lorries and other machinery fills me with dread. Currently the area is a haven for bird song, and quiet reflection while walking the many footpaths and bridleways.</p> <p>In addition, anyone who lives in this area will know that the few lorries that do venture onto our narrow local roads do not do so without importing significant increased road safety risk. 42 additional lorry movements a day will inevitably put more local residents at risk.</p> <p>And for what? The digging up of clay and the tipping of demolition waste, neither of which are necessary, in the heart of a centuries-old woodland habitat dotted with ancient and veteran trees (specifically protected by WSCC's tree plan) and threatened species.</p> <p>Please please refuse this application.</p>
