| Comments | <p>I've worked and lived in this area all my life. My business led me to travel the county of West Sussex and there are very few places as tranquil, untouched by industry or commercialism, full of wildlife and a tribute to largely untouched nature as the proposed site at Pallinghurst woods.</p> <p>Any development here would greatly impact the natural habitat of protected bats, badgers, slow worms as well as the amazing flora - wild orchids as far as the eye can see in Spring, endless views of bluebells, amazing stacks of tall veteran oaks.</p> <p>I strongly object on the basis of an unsuitable visually impacting facility in an unsuitable location. WSCC own minerals plan is clear there are enough clay reserves and more suitable sites exist for the waste facility. I hope the planning team at WSCC are able to clearly see the many negatives to this application and reject it fully.</p> |
