| Comments           | My objection to this proposed development is concerning the destruction of woodland and natural habitat of the many species of wildlife in the area. The increase of HG vehicles is a concern because the impact on the access roads and the anticipated traffic issues detrimental to the safe usage of these affected routes to and from the proposed development. In rural areas, the anticipated number of HG vehicles that will be required to move clay from the clay pits will increase noise and air pollution the area. | r |
