Comment for planning application WSCC/030/21

Application number	WSCC/030/21	
Name	Matt Wates	
Address	BURLEIGH, POND CLOSE, POND CLOSE, BILLINGSHURST, RH14 0SH	
Type of Comment	Objection	
Comments	This development will cause severe traffic safety issues for the local area. The roads surrounding the proposed site are not suitable for the many large lorries that will be frequently travelling to and from the proposed site. The demand for clay is not sufficient to warrant need for a new claypit as the existing pits in surrounding areas more than covers the demand. On top of that, clay pits are usually adjacent to brick works so it is not economically viable to have a clay pit miles away from the nearest brickwork. It would also have a detrimental effect on the environment due to unessecary transport. The only reason LCP have applied for the pit is to allow them to build the waste recycling plant which will cause the same safety issues regarding large vehicles and unsuitable roads. It is impossible for 2 large vehicles to pass in the surrounding roads. These roads are also used by walkers, cyclists, horses and local people travelling around the area, the use of these roads by large vehicles will damage the already poor condition roads and make them dangerous for local people.
