I am so angry that again our elected councillors are even thinking about granting a planning application like this. Why should this ancient woodland and beautiful area of West Sussex be destroyed for profit. It is not about the extraction of clay, it is about burying waste. All our lives will be altered, increased traffic and pollution, noise and dirt and the area concerned will never return to its previous unspoilt state. The damage to the environment will be forever. We do not want lorries coming through the lanes, we do not want fleura and forna destroyed. Stop building! Stop destroying the green belt.
