Objection

I object on the grounds of the environmental damage this proposal will cause, in particular the destruction of mature woodland and wildlife habitat on the site itself and more widely on the access routes. We can ill afford to lose yet more relatively unspoilt countryside, particularly in the light of the threat of climate change. Furthermore, noise and light pollution from the excavation and waste dumping will have a significant impact on a much wider area, not just the application site. Many people enjoy these woods recreationally and the proposal will be detrimental to such activities. This proposal is wholly inappropriate on the basis of what will be destroyed and the associated vehicle movements required to access a relatively remote location.
