Objection

I am aware I have just missed the deadline - apologies - hence a very brief response. I wish to note my objection to this planning application for extraction of clay from this area. The surrounding woodland and scrub is important habitat that needs to be left intact for its biodiversity. Filling the pit afterwards with inert waste and landfill further destroys this natural habitat. All this will bring increased activity, noise, traffic and disturbance to an area which should be left wholesome and part of a functioning nature network. In its current intact state it delivers natural services and resources to us from which we benefit. These will all be lost if the clay is extracted from this site. At a time of biodiversity loss we need to protect the precious landscapes that we've got left.
