Re Planning Application WSCC/030/21

Objection

1 As owner of the land which Loxwood Clay Pits Limited propose to haul waste across, I object to the planning application, because it will impact on my established farming activity.

2 I had an agreement with the previous owners that they could transport timber out, and I could transport cattle in and out, to graze the fields, with reciprocal use of the track. For over twenty five years I held a key for their gate.

3

(a)The first thing Loxwood a lay Pits Ltd did was to erect new gates and deny me access.

(b)Next they sent a solicitors letter demanding that I take cattle fences to allow easy access to their site, threatening legal action if I did not comply. This would prevent me from grazing my own cattle on my own land.

4 In my dealings with this company, they have been aggressive, domineering , with total disregard for my livelihood.

If this attitude filters down to their workforce I fear for all road users in the locality, with forty lorries a day going in and out of this site.
