PLANNING APPLICATION No. WSCC/030/21  
COMPLAINANT'S NAME - IAN M. RAMSAY

Dear Sir/Madam,  
I am a resident of Loxwood for the last 45 years and I never imagined that I would see a proposal such as this in this area - a greenfield site. My understanding was that such waste facility operations should be sited in built up areas or brown-field sites. If this proposal is deemed suitable then we are moving in a direction which flies in the face of

Ian M. RAMSAY

conservation, reducing traffic pollution, road safety and effect on the countryside not to mention the greatly increased heavy vehicle traffic on minor country roads.

The 50% of the waste brought to the site that will be buried will undoubtedly contain hazardous materials that may well have adverse repercussions at a point in the future. W.S.CC has ample clay reserves which leads me to wonder whether the

Ian M. RAMSAY

Clay mining aspect of the  
Proposed Venture is a  
Smoke screen to mask all  
the highly unattractive aspects  
of the waste recycling and  
burial.

There is much more I  
could say but these are my  
main comments, and in  
conclusion I am 100%  
opposed to this ill conceived  
Proposal.

Yours sincerely

Ian M. RAMSAY
