Loxwood Clay Pits Ltd

Planning Application WSCC/030/21

We object most strongly for planning for the above application it will alter the area. Constant heavy HGV Traffic for 33yrs that we the general public will have to put up with. Noise Pollution danger to us on roads bridleways, pathways also our villages. This should not be allowed it will spoil the natural environment wild life, trees, woodland, birds which we need for our mental health to be able to enjoy these things and not have them taken away.

There will be an increase in traffic in carbon emissions, impact on highways, severe road safety affected . It seems there is no demand for brickmaking clay as theres years of reserves yet to be used. Why do we need buildings on woodland sites. Waste sites should be in built up areas away from natural beauty. Please do not let this go ahead.

Yours Sincerely

Mr & Mrs Timms
