Objection

I can only repeat my grave concerns that I gave when objections were first invited. Not only would this lead to the destruction of much valued woodland but it would also create an area of massive pollution through waste disposal. In addition the trucks going through village lanes would destroy the surfaces and cause considerable noise pollution in rural communities. My career was in Secondary Education and pupils were often set the task of considering new developments on the environment and the impact on people's lives. As an example this is clearly unacceptable and should be turned down by those who have the responsibility to manage our communities and environment with due consideration.
