Comments	<p>I object to all applications on the grounds off habitat conservation and safety concerns.</p> <p>We have very limited areas that are undisturbed large areas of woodland in West Sussex and the area should be preserved. Pallinghurst woods is a haven for rare butterflies birds , mammals including bats and lizards and snakes all of which I have witnessed in these woodlands. The disturbance is likely to destroy or displace these important creatures.</p> <p>The road system locally is totally inadequate for the type of vehicles that would use these facilities and have a detrimental impact on locals lives.</p> <p>Personally I would miss the tranquility of this beautiful area which is already being destroyed by the present owners.</p>
