## Comment for planning application WSCC/030/21

Application number	WSCC/030/21	
Name	Charles Todhunter	
Address	RYLEY COTTAGE, HIGH STREET, HIGH STREET, BILLINGSHURST, RH14 0RD	
Type of Comment	Objection	
Comments	I wish to raise a further objection to this application. The additional information provided contains water demand calculations for the mist-air system, which conclude that this system can comfortably be supplied using surface water collected in the settlement pond. The applicant then goes on to state that 'treated surface water will be used for hand washing and toilet flushing' but fails to provide any calculations for the water demand this will generate and whether or not this demand can also be satisfied by the rainfall collected in the settlement pond. Furthermore, the report states 'drinking water will be imported to sitesourced from outside the North Sussex Water Supply Zone' but provides no details or assurances on where this water will be supplied from and how this will be monitored for the duration of the operation of the site. It CANNOT therefore be concluded with certainty that this proposal complies with the Natural England water neutrality requirements. It is disingenuous for the report to claim otherwise.
