

# Comment for planning application WSCC/030/21

Application number	<input type="text" value="WSCC/030/21"/>
Name	<input type="text" value="Chris Heath"/>
Address	<input type="text" value="HYES FARM, GUILDFORD ROAD, GUILDFORD ROAD, HORSHAM, RH12 3BX"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>I objected at the time of the original application and see nothing in the latest document that even remotely covers the issues raised, indeed if anything it only raises further concerns though given the length of this latest submission (using the principle of quantity over quality) precludes me from responding specifically on other than a small number of points.</p> <p>I note that they are seeking to establish the whereabouts of the numerous objectors. I find this somewhat sinister but irrespective of whatever limitations they are seeking (I live c5 miles away) I very regularly use the Loxwood to Bucks Green road and indeed occasionally walk the affected footpaths.</p> <p>I note that the applicant is critical of the minerals and waste policy of WSCC. I would suggest that this cannot be the forum for such a debate and the application should comply with whatever policies are in place.</p> <p>Nothing in the document addresses the increased lorry usage of the Loxwood to Bucks Green road and the site entrance remains a serious hazard on top of the impact on all other road users, including numerous cyclists that use this route, noting also the governments latest road changes to protect this particular group of users.</p>
