Comments	<input type="text" value="The latest additions from LCP do nothing to alleviate my fears for this proposal. In fact, the adversarial tone adopted by LCP only leads me to believe that LCP is unlikely to take the safety of walkers and cyclists into consideration, protect the existing wildlife or that the development would have any benefit to the community and only serve as a money making exercise for the owners to the detriment of the environment and community. My objections as per my original comments stand."/>
