

# Comment for planning application WSCC/030/21

Application number	WSCC/030/21
Name	Julian Chute
Address	SAWASDEE, LOXWOOD ROAD, LOXWOOD ROAD, HORSHAM, RH12 3DW
Type of Comment	Objection
Comments	<p>Further to my original objection, I wish to also object to the further information supplied by Loxwood Claypits.</p> <p>I understand that the estimated increase in HGV movements (apparently understated) could be 200% higher, any increase in heavily polluting vehicles along an unsuitable narrow lane would be a potential environmental &amp; safety disaster waiting to happen.</p> <p>The affect on wildlife due to this project does not appear to have been comprehensively evaluated.</p> <p>This is a water stressed area, I fail to understand how this will be improved?</p> <p>The applicant appears to be attempting to try to exclude objections based on the objector not residing in the close vicinity of the site?, is this relevant?</p> <p>This site, being woodland, enjoyed by many members of the public, many from far afield, is completely unsuitable for the purposes intended by this project. The fact that there is no requirement for this clay &amp; the distance that HGVs would need to travel through both woodland (crossing footpaths / bridleway) &amp; unsuitable roads is significant.</p> <p>The applicant seems to be attempting to bully anyone who displays any objection to the application, &amp; from viewing the correspondence with the Council included in the additional information, pressure is being unduly applied to the planning department.</p> <p>It would seem that corporate greed is the only reason for this application, at the expense of the environment, woodlands, wildlife, safety &amp; lives of the many people who will be so negatively impacted.</p> <p>All of my original objection comments stand. Please take my points into consideration.</p>
