Objection

## Dear Sirs,

I am writing to you as a resident of Bucks Green, Rudgwick for 20 years to object to the above planning application in the strongest terms as the site proposed is totally unsuitable for the purposes proposed.

WSCC mineral monitoring report states that there is no demand for additional brick making clay and that WSCC have more than 25 years of reserves.

The proposed site is also a greenfield site and that National Policy states that waste sites should be sited in brownfield sites, and there should be suitable access to these sites which does not include minor roads and woodland tracks, particularly for the vehicles that are intended for this project. This site also has a number of rights of way across that would have to be maintained and having HGV's alongside rights of ways particularly;rly footpaths is a recipe for a Health and Safety disaster. Furthermore the damage to the local environment form light and noise pollution from heavy machinery, HGV's and other fossil fuel burning plant would destroy the local surroundings which currently provide a safe haven for the local wildlife.

I cannot emphasise enough the effects of the increase in traffic, particularly HGV traffic, in the local villages. The local roads are minor roads and not designed for this type of operation, a c300% increase in HGV traffic would present a severe safety risk, and the damage caused to these roads by the amount of HGV traffic would be significant posing a further safety risk.

This planning application should be refused.
