| Comments           | <input type="text" value="Firstly, I don't fully understand why the applicant/Cleo has sent in all this additional stuff to the Council. I haven't read every last page - just dipping in and out, it all looks so irrelevant/unimpressive when you think about the key issues (the environment, woodland protection, traffic safety, local amenity, etc) - but I really am struck by how negative much of it is. I always thought an applicant should put forward positive evidence in support of its application, not waste everyone's time moaning about the local community and its legitimate concerns. I objected to the original application and I object again now. Honestly, the applicant/Cleo should just stop with all this nonsense."/> |
