## Comment for planning application WSCC/001/22

NameTony SeatonAddressBarleycorn, Rownhams Lane SouthamptonType of CommentSupportRecent events have highlighted why we need fuel security. There is no planning harm leaving the site for two years waiting for other results from nearby sites. The delay was caused by failed high court objections that have jepodised our fuel securityThere is a potential for gas within this licence area which could be converted to zero carbon hydrogen leaving the carbon in the ground, using membrane technology.	Application number	WSCC/001/22

There is a potential for gas within this licence area which could be converted to zero carbon hydrogen		Support	
It would be premature to close down this suitable established site , Net zero 2050 is a TRANSITION, not a switch off. If the council is swayed be SWITCH OFF PROTESTORS there will be significant impact to the UK economy.
