I strongly object to Planning Application WSCC/046/23 filed by UKOG (243) Ltd to extend by a further 24 months their permission to again hold this land for apparent Phase 4 site retention and restoration. This site has laid dormant for a number of years and this company must not have their permission renewed by WSCC to continue stalling on restoring this site. They must be held to account by WSCC and made to fulfil their financial and environmental responsibility of restoring the site. I urge members to refuse UKOG permission for this extension. If this is unfortunately not the case, and WSCC again renews this unnecessary extension I ask that they make as a condition of renewal, a Bond of some sort to ensure that UKOG set aside sufficient funds to remedy the site in the future.
